

HR under pressure, helping people achieve more with less

HR leaders in higher education and health coming together to share experiences, successes and learning.

Productive networking is a keystone for both the HPMA and UHR, so in our inaugural event together, this cross sector programme holds networking and collaboration at its core. HR leaders from across higher education and health are coming together to discuss how HR can and does deliver huge value when budgets are being squeezed.

In recent years, the healthcare and higher education sectors have seen tightening budgets and are under pressure to deliver more with less. What can the two sectors learn from each other, and from organisations within and beyond the sectors that have successfully achieved change? How do we, as effective HR professionals, lead people through complex and uncertain times?

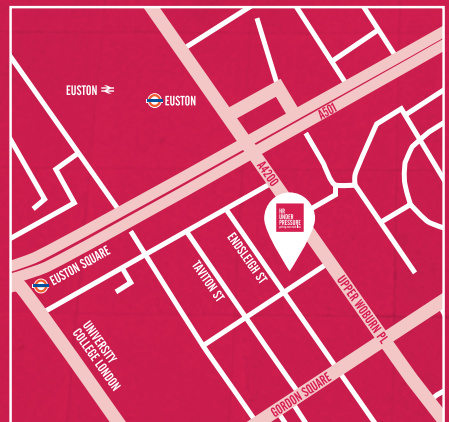

This event is free to attend but exclusively open to HRDs or their DHRD representatives based in healthcare or the higher education sector.
